Main model affine observation map: Pt_18_FD18_5
normal test origin 68.74 s; frozen β=-0.948, f=1.190 Hz; κ₂(A)=69.0
Latent Hopf state
Stable frozen-coefficient cycle (r = 1)
Unstable inner cycle (r = 0.974)
Saved ensemble-mean forecast (5 s)
Forecast start
Forecast end
Latent coordinate z_1
Latent coordinate z_2
Original two-channel force space
Mapped stable cycle
Mapped unstable inner cycle
Decoded ensemble-mean forecast (5 s)
Forecast start
Forecast end
Affine-map center c
Force channel 1 (record units)
Force channel 2 (record units)
Dashed curves are deterministic references with parameters frozen at the origin and σ=0; the solid curve is the saved 128-path ensemble mean (phase averaging can pull it toward the center; it is not one path).
